Quality Improvement Toolkit

'Five whys' – a practical example – what do you think is the root-cause?

Run Chart – Infection rate vs Target

What do our learners think?

Hoping to implement a pilot project to improve access to mainstream health services for people with learning difficulties, and this has been very informative and helpful and will definitely be put into practice.

The practical skills and frameworks are fantastic and such a great way to engage and inspire others. They will definitely help identify why a challenge is a challenge and instigate conversations about how we can overcome and/or improve processes
